

Nuance Healthcare Developer Platform

Welcome Kit: Evaluation

Dragon Medical SpeechKit (Premium)

Congratulations!

Your application for an evaluation license to the Nuance Healthcare Development Platform has been reviewed and approved. We are delighted to have MD24 Inc. as a **Dragon Medical SpeechKit (Premium)** development partner. All the information that you need to begin enabling your applications with our industry leading real-time, secure, streaming speech services is contained in this welcome kit.

Important Information

- Access to the Nuance Healthcare Development Platform is governed by the terms and conditions of the Evaluation Agreement.
- Under the free 90-day evaluation program, your license will expire on April 12th 2017 and cannot be extended. In order to continue accessing the developer portal after 90 days, you will need to enter into a commercial agreement.
- Your evaluation license grants access to four (4) user accounts. Each user account represents a personal voice profile that adapts to the individual user. As a result, these accounts must NOT be shared or reused under any circumstances, as doing so will lead to degradation in speech recognition accuracy. The first time a user connects to the system, the Dragon Medical SpeechKit creates a speech profile specifically for that user. If other users connect using the same user ID, it is impossible to achieve optimal speech recognition performance.
- In order to ensure that all members of your team receive email updates and important program notifications, we require that you setup a group email for your team that conforms to the following nomenclature: nuancehealthcare@yourdomain. By default, we will use the domain name of the email account that was used to register for the program for this group address. If this domain is not used for your group email, you must notify us immediately. Failure to create and maintain this group address may result in members of your team not receiving important email communications about the Dragon Medical SpeechKit and developer related notifications from Nuance.
- During your evaluation period, all support inquiries and requests must be submitted via the developer Forum found on www.nuancehealthcaredeveloper.com.

Evaluation License

As part of your Nuance Healthcare Development Platform membership, MD24 Inc. has been granted a 90-day evaluation development license contingent upon your acceptance of our Evaluation License. Please go to the developer portal at this link: <https://www.nuancehealthcaredeveloper.com/> and login with your credentials and you will be presented the Evaluation License, then click on the "Accept" button at the end of the Evaluation Agreement, and your license will become valid. This license is fully functional and provides full access to the Dragon Medical SpeechKit, subject to the following conditions:

- The license grants access to four (4) users for internal development and testing. A license is

automatically assigned to each of the first (4) unique users that connect to the system. For example, if you connect with a username of "john_doe", the first speech license will be assigned to that named user. If you then connect with a username of "john_doe2", then "john_doe3", then "john_doe4", a second, third, and fourth speech license will be assigned to those named users. At this point, your four (4) evaluation licenses are assigned to "john_doe", "john_doe2", "john_doe3", and "john_doe4" respectively. All subsequent attempts to connect to the system should use one of these usernames. If you subsequently attempt to connect with a fifth named user (e.g. "john_doe5"), you will get an error message indicating that no licenses are available.

- Your development license is limited to 100 minutes of recognized speech for the 90-day evaluation period. The development license should only be used for the purpose of developing and testing your application and speech profiles must not be shared or reused (see "Important Information" above).
- The evaluation version of the Dragon Medical SpeechKit uses the US English voice model. However, our streaming speech services are available in more than 20 languages and the SDK interfaces are completely language independent. Access to other language packages can be provided after the evaluation period based on geographic market.

Developer Portal Access

Your Nuance Healthcare Development Platform account has been activated. In order to access the medical speech client SDKs, simply login to the developers portal. In addition to the SDKs, the developer portal has full online developer and end user documentation as well as moderated support forums. Instructions for accessing the developer's portal are listed below:

URL:	https://www.nuancehealthcaredeveloper.com
Username:	MD24Dev

Access Keys

In order to access the Dragon Medical SpeechKit streaming speech service, you must pass a valid Partner GUID and an Organization Token to the SDK initialization call. The Partner GUID identifies MD24 Inc. as a valid partner and the License GUID serves as a development license.

Partner GUID:	da76b0a6-3428-4f0f-b1d0-f8d20909ffa9
Organization Token:	529363f9-68b8-456a-b57c-ce149676e7b4
Expiration Date:	April 12th 2017

Nuance Management Center (NMC) Access

Nuance allows you to create and manage test licenses during your evaluation. The login information provided below can be used to access the NMC portal. Open the link below and click "Forgot password" to set your password (a password reset link will be sent to the email address used to register your Nuance Healthcare Development Platform account).
